## Plan Ahead

1. Make an appointment at one of the clinics on the Low-Cost Clinics page.
2. Start prebaiting and prebait every day.
3. Trap the cats one or two days before the appointment. It's ok for the cat to stay in his trap for a day or longer. You can provide food and water for him and keep the trap clean.
4. On the day of the appointment, transport the cat to the low-cost clinic.
5. Pick up the cat, transport it to a safe enclosed place such as your garage or a shed and hold it there, in its trap, overnight.
6. Release the cat in the morning after the sedation has worn off.

## Working with Triple R Pets

1. Your feral cat will receive the full feral cat spay/neuter package including:
  - Spay/neuter surgery and eartip for visual identification
  - Rabies vaccination (for cats over four months)
  - Distemper vaccination
  - Parasite control for worms, fleas, ticks, earmites
  - Microchip registered with Triple R Pets
2. You will be eligible for the discounted rate of \$50 for the above services.
3. You and your colony will be registered with Triple R Pets and be legally protected.
4. Trap rentals are available to you.
5. Triple R Pets provides educational information and trapping tips.
